

Multifaceted System Expected Today

March 3, 2023
5:15 AM

A Wintry Mix of Rain & Snow, in Addition to Gusty Winds & Possible Flooding

Key Messages

- 4-8 inches of moderate to heavy snow, with isolated amounts up to 10 inches expected in the **winter storm warning area**, with a wintry mix of rain and/or snow elsewhere (2-5" snow in **Winter Weather Advisory**)
- Moderate to heavy rain may cause flooding, including rivers
- Northeast wind gusts of 35 to 45 mph are likely this afternoon

Watches, Warnings & Advisories

As of 4:30 am EST March 3rd, 2023

For a current map: www.weather.gov/iwx

NEW What Has Changed

- Winter Storm Watch Upgraded to a Winter Storm Warning or Winter Weather Advisory
- Wind advisory expanded

Next Scheduled Update

- This will be the final briefing for this event unless there are major changes

Winter Weather Update

March 3, 2023
5:15 AM

A Wintry Mix of Rain & Snow

Key Messages

- Rain moving in this morning/afternoon, changing to snow from NW to SE
- 4-8" (Isolated amounts to 10") of snow expected in the winter storm warning area
- 2-5" of snow in winter weather advisory area
- Confidence in the snow amounts is low to medium
 - System track could shift and move the area of greatest totals northwest or southeast
 - If rain/wintry mix prevails longer than expected snow amounts will be lower
- Snow will be wet and heavy
 - Greater potential for power outages with the snow and wind combination
 - Less chance for blowing and drifting

Storm Total Snow (in)

8 am EST Friday to 8 am EST Saturday

Rain & Flooding Update

March 3, 2023
5:15 AM

Moderate to Heavy Rain May Lead to Additional Flooding, Including Area Rivers

Flood Watch Remains in Effect

- Rain will overspread the area today, particularly along/south of US 24. Amounts of around 1 to 2 inches are expected.
- Ground is already saturated from recent rainfall, so we could see additional rises in area rivers/streams and renewed flooding in low-lying or flood-prone areas.
- Some rivers are forecast to go into minor-moderate flood by the weekend
- Isolated thunderstorms are possible

Storm Total Rainfall (Liquid Equivalent)

8 am EST Friday to 8 am EST Saturday

SPC Outlook for Severe Weather

- Marginal Risk for our southern CWA
- Low Confidence
- Threats: Flooding, Damaging winds
